

Heritage Classic™

Model CX04S

Handcrafted Natural Wood Garage Doors

NORTHWEST DOOR®

A Tradition of Quality Since 1946

Model C108A

Crafted to meet your Design Criteria

- Model E203S -

The Heritage Classic is natural wood garage door. It looks like old fashioned swinging doors but actually opens upward as a sectional overhead garage door.

- Model E308A -

The Heritage Classic can be crafted with either squared windows or arched window designs. All windows are true-divided and glazed with standard 1/8" clear annealed glass. There are a multitude of glazing options to choose from, including etched, obscure, tinted and insulated glass.

- Model C008S -

The Heritage Classic is available in both single car and double car designs. Arched windows are available in two standard arch dimensions, a 15'-0" and a 58'-0" radius. Custom arches can also be made to match the existing door opening from either a buyer's specified dimensions or a template.

- Model EA08S -

Squared Window Design

- Model CV08A -

2 Arches, Standard 15'-0" Radius

- Model C001A -

1 Arch, Standard 58'-0" Radius

- Model EZ08C -

The Heritage Classic is a complete operating system which includes your choice of standard lift or 7" low headroom clearance hardware. All doors are equipped with double end hinges, frequently spaced center hinges, horizontal steel trusses, and heavy duty commercial grade angle mounted horizontal and vertical track.

Almost Endless Design Options

Choose from a variety of standard designs or create your own design. Our standard overlay material is Clear Western Red Cedar. Many other select woods are also available.

- Custom Design, designed by buyer -

Tight Knot Cedar T&G with optional decorative clavos pins.

- Model CDH0S -

This CDH0S has Clear Western Red Cedar with optional decorative hinges and handles. You may add decorative hardware to your door to enhance the simulation of swing doors, see the complete selection at www.nwdusa.com.

- Model CX06S -

These door openings have clipped upper corners that were provided by the builder.

- Model EX08S -

This Model EX08S door has a squared window design, the door opening has an custom arched facade provided by the builder.

- Model CDH0S -

This Model CDH0S has no windows, it can be used on most arched door openings as well as squared openings.

- Model E206S -

- Model C008C -

These Model C008C garage doors have a custom arched window design to match the arch of the door openings, the T&G Western Red Cedar is applied to the door face in a Herringbone pattern.

A Tradition of Quality, Since 1946

Heritage Classic "E" Series

5/8" Clear Western Red Cedar Overlay

1/4" Luan Plywood Face

Choose from a large selection of our basic "E" Series Designs. It has a Clear Western Red Cedar Design Overlay and a Luan Plywood Face. It is constructed with a 7/16" Radius Profile on the inner edge of the Overlay Profile. Other face materials are available on the "C", "M" Series Doors.

Heritage Classic "C" Series

5/8" Clear Western Red Cedar Overlay

"C" Series offers all the basic designs as the "E" Series with 1x4 or 1x6 Tongue & Groove Clear Western Red Cedar face applied over the exterior layer of Luan Plywood.

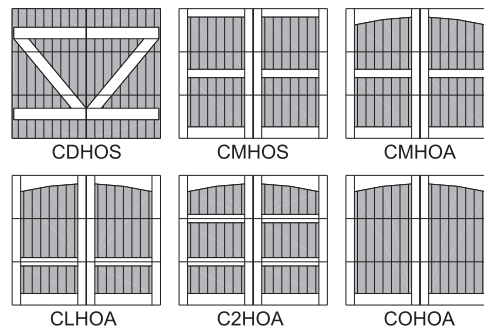

The "M" Series is a great alternate to the "C" Series when choosing to paint your door. It is constructed using a 3/8" MDO Fir Plywood face with V-Grooves cut to simulate 4" or 6" Tongue & Groove material.

Heritage Classic "H" Series

The "H" Series appearance emphasizes the "Barn Style" look with no windows. The overlay has a Butt-Joint on all edges. These doors are available with the same design material options as the "E", "C", & "M" Series.

Operating Clearances and Framing Requirements

Framing of the door opening on the interior of the garage should be prepared with a flush mounting surface for the garage door hardware. This area must remain clear with no obstructions. The flush wood mounting surface is constructed using 2x4 or 2x6 framing material.
